Genesis 1:24-31

- 24 Then God said, "Let the earth bring forth the living creature according to its kind; cattle and creeping thing and beast of the earth, *each* according to its kind"; and it was so.
- 25 And God made the beast of the earth according to its kind, cattle according to its kind, and everything that creeps on the earth according to its kind. And God saw that *it was* good.
- 26 Then God said, "Let Us make man in Our image, according to Our likeness; let them have dominion over the fish of the sea, over the birds of the air, and over the cattle, over all [the] earth and over every creeping thing that creeps on the earth."

- 27 So God created man in His *own* image; in the image of God He created him; male and female He created them.
- 28 Then God blessed them, and God said to them, "Be fruitful and multiply; fill the earth and subdue it; have dominion over the fish of the sea, over the birds of the air, and over every living thing that moves on the earth."
- 29 And God said, "See, I have given you every herb *that* yields seed which *is* on the face of all the earth, and every tree whose fruit yields seed; to you it shall be for food.
- 30 Also, to every beast of the earth, to every bird of the air, and to everything that creeps on the earth, in which *there is* life, *I have given* every green herb for food"; and it was so.
- 31 Then God saw everything that He had made, and indeed *it was* very good. So the evening and the morning were the sixth day.

Scientists recover T. Rex soft tissue

March 24, 2005 - For more than a century, the study of dinosaurs has been limited to fossilized bones. Now, researchers have recovered '70 million-year-old' soft tissue, including what may be blood vessels and cells, from a Tyrannosaurus Rex.

'The lab filled with murmurs of amazement, for I had focused on something inside the vessels that none of us had ever noticed before: tiny round objects, translucent red with a dark center. Then a colleague took one look at them and shouted, "You've got red blood cells. You've got red blood cells!"'

Schweitzer confronted her boss, famous paleontologist 'Dinosaur' Jack Horner, with her doubts about how these could really be blood cells. Horner suggested she try to prove they were not red blood cells, and she says, 'So far, we haven't been able to.'

The boot was hand made by the M. L. Leddy boot company of San Angelo, Texas which began manufacturing boots in 1936. Leddy believes the boot was made in the early 1950's.

Man's Best Thinking

A **technological singularity** is a hypothetical event occurring when technological progress becomes so rapid that it makes the future after the singularity qualitatively different and harder to predict. Many of the most recognized writers on the singularity define the concept in terms of the technological creation of super intelligence, and allege that a post-singularity world would be unpredictable to humans due to an inability of human beings to imagine the intentions or capabilities of super intelligent entities.

Which One Is An Herbivore

Panda Bear

Diet: Pandas have a very specific diet consisting almost entirely of leaves, stems, and shoots of various bamboo species. They spend between 10 and 12 hours eating bamboo every day. An adult can consume between 26 and 33 pounds per day. Although they are too slow to catch most animals, they have been known to eat meat when the opportunity arises.

Genesis 1:31
